

SUNFORM ALPHABET

WHAT IS SUNFORM ALPHABET?

Sunform is a supplemental, neurologically integrated beginning literacy program that rapidly assures kindergarten readiness. Sunform is a stand-alone, literacy plug that compliments VPK providers' core curricula.

IS SUNFORM ALPHABET RESEARCH BASED?

Yes! To the best of our knowledge, Sunform Alphabet is the only **research proven**, neurologically integrated early literacy program available. Please see www.ventrislearning.com for details.

WHY SHOULD I CONSIDER IMPLEMENTING SUNFORM ALPHABET?

Because years of data show Sunform Alphabet assures that almost all (over 90%) of your 4-year-olds will begin blending and achieve kindergarten literacy readiness in less than 10 weeks, regardless of school preparedness or home language. Students typically learn one or more letters per day, rather than the "standard," one letter per week.

HOW DO I IMPLEMENT SUNFORM ALPHABET?

Twenty years' experience shows that with only 15 – 20 minutes of direct (scripted) instruction per day, students quickly master all 26 letter sound/symbol correspondences to automaticity. Sunform begins by teaching letter sounds from pictures, not letter name sounds.

WHY IS THIS ACCELERATED APPROACH IMPORTANT?

Because by satisfying kindergarten literacy requirements in 10 weeks or less, educators may spend more instructional time on remaining PreK domains (e.g. Math; Science; Social Studies, etc.). Providers may change core curricula, yet students will still benefit from Sunform.

HOW MUCH DOES SUNFORM ALPHABET COST?

A Classroom Pack (20+ students) costs \$1,279.00. Kit life varies from 15 to 20 years.
